

February 27, 1976

if the hunters of the state are going to put up 2.7 million dollars, let's show our good faith and make sure that others do it. There are some other issues to the bill that I will address later, but what I am asking you to do here is, number one, to make sure that that money is spent only for the acquisition of that land either by purchase or lease, and number two, I am asking you, with all those people that appeared before that Committee and I am sure they would want to do this, I am sure they want to share in the responsibility for helping in the development of the habitat land, and I am asking the state to match dollar for dollar what the hunters in this state are going to give and I think that is fair. I think this amendment will make it a fine bill. In fact, I think this amendment will make it a tremendous bill and I would hope that you could support me in that effort.

PRESIDENT: Senator Marvel.

SENATOR MARVEL: I would like to have Senator Syas listen to what I am about to say, sometimes, I am not standing on my feet to protest the mission of this particular bill. I am standing on my feet, incidentally, we have a bull whip over here in case anybody is interested as either chairman or vice chairman of a Standing Committee. This is the solution to some of our problems. I am protesting what I think is true, and Senator Syas, if I am unfair to the bill, I assume you will jump to your feet and use your mike and answer because that is exactly what I want you to do. The Game Commission over the years has been very aggressive in raising fees and earmarking revenue. Now there is a difference between earmarking appropriations and earmarking revenue. The Game Commission likes to gather under its collective wings money which it then indicates it belongs to itself and it can spend it as it sees fit. It may present to you a voluminous book which includes many projects but those projects can be shifted around at the will of the Commission and the Director. Now I think that any money that is put in any Department's fund, first of all, should not be earmarked, and if you insist on earmarking it, then please insist that the Department have a specific plan which can be reviewed annually so that this Legislature has some control over the money and where it is spent. Do not give to these Departments unlimited money and let them think that it belongs to them alone and they are not responsible for reporting. In the final analysis, the legislative body, whether it is in a state or in a national government, has one final tool that is to be used for the benefit of the taxpayers and that is what we call overview. We have got to have some method whereby we insist that when these Departments ask for money, whether it is increased fees, whether it is increased cash of some other type, that they still come back to this Legislature and report and I am sorry to say to you that the Game Commission in the
